

CONWAY

FLOORING & DECKING

COMPANY PROFILE

SUCCESSFULLY COMPLETE ALL PROJECTS TO THE ULTIMATE SATISFACTION

Conway flooring and decking is a specialist flooring and decking installations company.

Managing Director Byron Conway has More than 12 years of experience in the flooring and decking industry, first in manufacturing and sales of solid hardwood flooring for Bedson Timbers, before being involved in the Inovar group for 9 years in residential and large scale commercial sites doing flooring and decking installations.

We source, supply and install flooring and decking products to suite your requirements, budgets and focus on turnkey solutions – from design and implementation, to construction and completion.

Relationships are our main focus and will

go out of our way to ensure customer satisfaction on all our projects.

Contact Conway flooring and decking today to discuss how we can work together to achieve your needs.

VISION & MISSION

Our vision at Conway flooring and decking is to create sustainable living, working, and commercial spaces that push architectural and design boundaries while respecting and incorporating the environment.

The Conway flooring and decking mission is to successfully complete all projects to the ultimate satisfaction of our clients and partners, in budget, on time, every time.

WHY CHOOSE US

We pride ourselves on quality and only supply products that are manufactured to the highest European standards.

Offer a written warranty on all ranges.

Outlived our original warranties.

We are a member of SAWLFA, and we conform to SAWLFA prescribed standards on installations.

All flooring we supply comes with a written 10-25 year surface wear warranty. This is an internationally recognized written and recorded warranty.

All installations come with a 5 year warranty.

Our products have been used in South Africa for over 22 years. So you can be assured they will live up to expectation.

We keep abreast of current designs trends and ongoing product development and improvements.

Our integrity is fundamental to our business and can be validated by the list of satisfied customers.

We are an owner-managed company and either one of the directors will be on site.

By using a hands-on approach, you can be assured of the best quality workmanship on every site.

We are a level four B-BBEE contributor.

OUR PRODUCTS

For decades, solid wood has been considered a luxury item to install in the home or office. This is due to its timeless elegance that are not dictated by fading fashion trends. A quality solid wooden floor will last you years to come and increase the value of your home.

Advantages of Solid Engineered Wooden Flooring

Environmentally Friendly: Less precious wood is used in the manufacture.

Pre-finished: installations are quicker and can be walked on immediately.

Long lasting: Planks can be sanded up to 3 times in their lifecycle.

Stable: Rigid planks that don't warp/bend as easily as solid timber flooring.

Locking System: Tight fit ensures water is less likely to penetrate and allows for the floors to be removed and re-installed if damaged or required.

FSC certified: Forest Stewardship Council is an international non-profit, multi-stakeholder organization established to promote responsible management of the world's forests.

We take flooring seriously, therefore we are the only supplier and installer that have products that outlived their original warranty.

Oak engineered hardwood flooring is our most popular range of flooring. It offers beautiful character, a vast array of finishes and coupled with good durability. Making

oak flooring unmatched in terms of its versatility.

Flooring specifications

(typically offered but not limited to)

Oak engineered multiply hardwood flooring: each floor board is engineered, consisting of several layers of hardwood, of which the top visual layer is European oak.

Wood grading: Each tree is unique and different parts of the same tree produce different surface textures and appearances. We supply 2 grades of flooring namely Clear and Rustic.

The Clear grade is selected from the fine grain wood found around the centre core of the log where there are no knots, each tree produces fewer clear grade planks.

Rustic grade is manufactured from the outer parts of the core where branches attach and is full of character and visibly knottier.

Thickness

A variety of thickness are available. Each to suite your needs. Our entry level engineered board comes with a 0.7mm top layer, followed by a 2mm, 3mm, 4mm and 6mm thickness.

Sizes typically offered (typically offered but not limited to):

1. 158mm wide x 1220mm long x 10/3mm thick
2. 190mm wide x 1900mm long x 15/4mm thick
3. 220mm wide x 2200mm long x 15/4mm thick
4. 190mm wide x 1900mm long x 21/6mm thick

OUR PRODUCTS

5. 220mm wide x 2200mm long x 21/6mm thick

6. 260mm wide x 2200mm long x 21/6mm thick

Vinyl flooring is synthetic flooring that is available in a plank form. It is a manufactured rigid core board that is then treated with a decorative layer of vinyl that gives it the look you desire; such as a hardwood floor appearance. Afterwards, a transparent protective layer (AC layer) is then applied to ensure your vinyl floors are durable and stain resistant.

Advantages of Vinyl Flooring

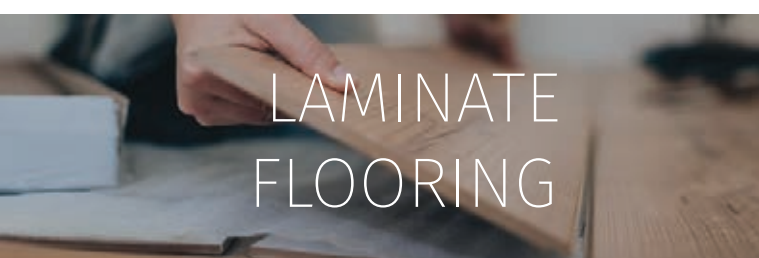

Soft surface: Vinyl Floors offer a softer surface than other flooring options making it quieter underfoot.

Variety: we offer a wide range of vinyl planks in thickness and width.

Long lasting: Vinyl Flooring is extremely durable and is well known in the flooring industry to stand the test of time.

100% water-proof: Making it easier to clean and maintain.

Trouble free maintenance: All you need to do is sweep and mop.

Laminate Flooring is a multi-layer synthetic flooring material that is fused

together in a lamination process. This type of flooring imitates the look of wood with a photographic print layer under a clear protective film.

Advantages of Laminate Flooring

Easy installation: Simply click together, saving you precious time.

Variety: We offer a wide range of beautiful, high quality laminated flooring.

Cleaning is easy: Simply dust or vacuum followed by a damp mop or cloth.

Hypoallergenic: As it does not absorb dust or promote growth of dust-mites and micro-organisms.

Affordable: Laminated flooring costs a fraction of the price of real wood.

This afford-ability has led laminate flooring to become one of the most chosen materials for home and office use.

We specialise in the custom design and installation of beautiful wooden stairs using solid timbers. We use the best woods available.

Timber species include:

- Oak
- Kiaat
- Teak
- Meranti
- Saligna
- Pine
- (others available on request)

OUR PRODUCTS

SOLID WOOD FLOORING & PARQUET

Solid wood flooring remains the Rolls Royce of flooring. We offer a range of options to suite your look and feel.

These floors are installed as a glued down floor and can be finished in a number of different ways and finishes.

These are usually custom floors which need to be sourced and requirements to ensure floors meet specifications normally takes longer than normal.

COMPOSITE DECKING

Composite decking is a low-maintenance and long-lasting solution for all outdoor entertainment areas.

This plastic decking is weather-resistant and extremely durable. It retains its good looks no matter the time of year and needs only a fraction of the time spent to maintain standard wooden decking.

It is available in a number of ranges with varying warranties available. Products available in composite include decking, pergolas, balustrades, cladding and screens

TIMBER DECKING

Timber Decking adds an organic and natural feel to any surround. We offer a wide selection of decking timber and installation solutions to suite all environments.

We typically work with the 4 best decking timbers in the world namely:

- Ipe
- Garapa
- Massaranduba
- Jatoba
- Other timber species also available: Balau, Rhinowood, Meranti, CCA treated pine

Installation Options Include:

- CCA treated pine and galvanised steel sub-frames
- Easy Clip System
- Conventional top fixing method

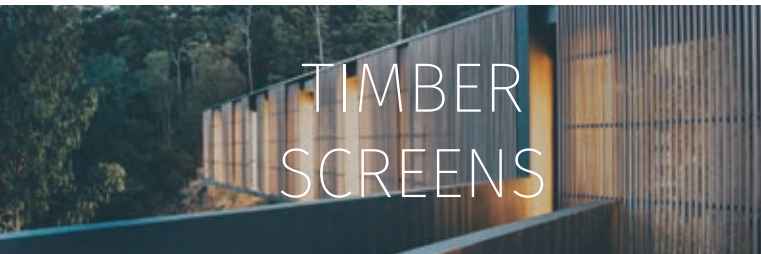

PERGOLAS

Pergolas are a modern feature in today's building industry. They usually add an outdoor area that is an extension to your home.

Both timber and composite pergolas are increasingly popular and are available in a number of timbers, colours and finishes.

OUR PRODUCTS

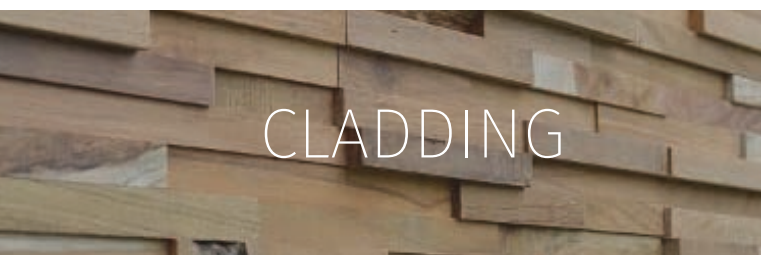

Typically your composite products require little to no maintenance whereas your timber pergola's would require annual maintenance to them.

Timber screens are the ideal way to modernise indoor, out-of-weather spaces, while providing privacy and shade protection.

Perfect for both commercial and residential applications. Available in composite and timber products. These are fully customised to suite the look and feel you want to achieve.

- Choice of timbers and profiles to achieve a seamless look with the surrounds.
- An instant pick-me-up for ageing buildings, providing contemporary warmth and adding value.

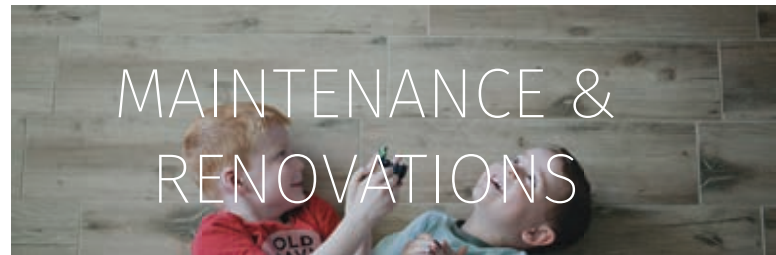

Timber cladding is an increasingly popular choice for finishing the outside of commercial and domestic properties.

Otherwise known as timber weatherboarding or timber siding, it is an attractive and economical way to finish the exterior of both old and new buildings.

Suppliers are constantly bringing in new

options in cladding to minimise costs of material and installation times.

Available in both timber and composite, you are able to do a number of designs with options to open gaps between panels to your desired finish.

If you are looking to spruce up your existing wooden floor or simply maintain it then look no further. We provide turnkey solutions to restoring flooring back to prime condition, and offer maintenance programs to ensure that the floor stays healthy and alive all year round.

Using only high quality products which will promote longevity and reduce tiresome maintenance.

Wooden flooring is a lifetime commitment with timeless effects - so why not treat give the flooring, which is an organic product the care it deserves. It will return the favour, guaranteed!
